Introduction

The following enterprises are in the business of accepting, recycling, processing, and/or disposing of various hazardous wastes. The U.S. Environmental Protection Agency does not endorse any of these firms and cannot vouch for the environmental adequacy of their operations. This list, which is furnished as a public service, will be revised as the EPA, Office of Solid Waste (OSW) becomes aware of significant numbers of other similar enterprises that accept hazardous wastes for disposal. These facilities are those that OSW is currently aware of; information on new facilities or those not listed can be forwarded for inclusion in the next update of this publication to Program Manager, Assistance Program, Hazardous Waste Management Division (AW-465), Office of Solid Waste, U.S. Environmental Protection Agency, Washington, D.C. 20460 or to the OSW representative of the appropriate EPA Regional Office. (Appendix F)

Facilities disposing of pesticides or pesticide containers should conform to the "Recommended Procedures for the Disposal and Storage of Pesticide and Pesticide Containers", as published by EPA in the Federal Register, May 1, 1974 and October 15, 1974. Those utilizing incineration or landfilling should conform to EPA's landfill and incineration guidelines as published in the Federal Register, August 14, 1974, and to all applicable Federal, State, or local regulations.

Several States allow certain hazardous/industrial wastes to be disposed of in particular landfills on a case-by-case basis. For all disposal actions, the State solid waste or hazardous waste management agency (Appendix E) should be consulted before ultimate disposal.

Disposal Methods Key

The following listing indicates the number of hazardous waste management facilities, solvent reclaimers, metal reprocessors, petroleum re-refiners and industrial waste information clearinghouses in a particular State. States with the notation - NA - have been identified as not having any commercial firms that process or treat hazardous/industrial waste. States that allow landfilling of hazardous wastes in municipal landfills have not been identified in the listing; the user is referred to the appropriate State agency for regional disposal regulations. Specific public landfills are not generally listed with the exception of California Class I landfills.

User Instructions

The data on hazardous waste management facilities are presented in a synopsized format. The facility listings are organized by state. Only those states that are known to have commercial hazardous waste management facilities are included in this directory; however, many operations maintain an interstate transportation capability.

The facility formats are abbreviated characterizations of the waste management facility's operation. Detailed information on the facilities can be obtained from the individual waste management facility or the appropriate State Solid Waste or Hazardous Waste Management Agency (Appendix E).

Format

Services:	Describes range of operations that the facility may perform for a client.
Wastes Handled:	Includes wastes accepted and considered by the facility. Many operations select waste on the basis of analysis of each batch.
Wastes Excluded:	Generally, most facilities do not accept radioactive materials nor explosives; exceptions are noted under "Wastes Handled".
Processing:	Describes basic treatment or chemical processing used to detoxify or neutralize wastes.
Disposal:	Notes ultimate disposal methods for wastes handled. Includes landfills, secure landfills (chemical waste landfill), incineration, ocean dumping and deep well injection.
